

AHMED EL FATEH

Digital Product Manager / Product Lead

[LinkedIn](#) · (+20) 155567-1258 · afateh@me.com

PROFESSIONAL SUMMARY

Product leader with 13+ years taking digital products from concept to scale across fintech, edtech, and government platforms in Egypt, Saudi Arabia, the UAE, and Kuwait. I own products end to end, from discovery and strategy through delivery with engineering, and I turn user and market research into roadmaps teams can build against. I have scaled a consumer wallet 20x, led the redesign of an insurance platform rated 4.7 stars by 157,000+ users, and shipped AI into live products, including my own SaaS. A Computer Science degree and a Marketing MBA let me work across the technical and commercial sides of the business.

SELECTED IMPACT

- **Tameeni:** Led the redesign of Saudi Arabia's leading motor-insurance app; the version live today, rated 4.7 stars by 157,000+ users with 1M+ downloads, is the one I shipped.
- **Tekka Pay (formerly AeveaPay):** Owned product for a live fintech wallet, scaling it from 5K to 100K+ users and growing transaction volume 35%.
- **Nagwa Classes:** Launched major components of Nagwa's live online-learning product, now past 1M+ downloads.
- **Aanaab:** As Scrum Master, delivered dozens of successful sprints for this Saudi teacher-development platform, now serving 200,000+ registered teachers and still live today.
- **Super CV:** Built and run a live AI SaaS I designed, engineered, and shipped solo, with AI-tailored CVs, an application tracker, and mock-interview prep.

EXPERIENCE

Director of Solutions, GeoTech — Egypt / Riyadh

January 2026 – Present

- Owning the end-to-end product roadmap and driving new GIS solutions from concept to launch serving the B2G segment, resulting in multi-million dollar deals with several municipalities and government institutions.
- Delivered a geospatial data-management DSS allowing non-professionals to take advantage of spatial analysis.
- Set product vision and strategy across product, design, and research, and own delivery with engineering by turning technical constraints into scope decisions the business can act on.
- Leveraged AI-powered tools and automation to enhance product intelligence, documentation, and decision-making.
- Lead a team of 20 across product, design, development, QC, and research, setting the vision and translating government needs into a roadmap the whole group builds against.

Principal Product Manager, GeoTech — Egypt / Riyadh

August 2024 – January 2026

- Shipped a geospatial DSS now used inside several government entities, giving non-technical staff direct access to spatial analysis for planning and decisions that previously required GIS specialists.
- Manage complex relationships with engineering teams and stakeholders to ensure proper delivery.
- Drove a privacy-first data design with engineering, splitting a data lake for analytics from PostGIS for live map operations, and using RAG to feed the LLM only schema from a vector database so it generated spatial queries without ever touching client data.
- Mentored 4 product managers and set the processes of discovery and prioritization.

Research Manager, Rasan FinTech (Tameeni) — Dubai / Riyadh

October 2023 – June 2024

- Guided design and product teams in adopting design thinking by conducting workshops and training sessions, and monitoring.
- Authored and executed research plans, leading qualitative and quantitative marketing research (interviews, focus groups, usability testing) and behavioral analysis (GA4, Hotjar) to identify user segments, pain points, and inform feature decisions.
- Led the design and research team to revamp the main company product, "Tameeni."

Senior Product Manager, Rasan FinTech — Dubai / Riyadh

May 2023 – October 2023

- Focused on the Saudi market, conducting regulatory compliance audits and market research, ensuring products met regulations.
- Pioneered the inception of new insurance products, diversifying the company's portfolio and contributing to a 10% increase in revenue.

Product Lead, AevaPay — Egypt

February 2022 – May 2023

- Managed product strategy and roadmaps for digital solutions including card acceptance, POS systems, ride-hailing, and wallets.
- Led cross-functional teams to deliver increments, resulting in 20x user base growth within 12 months.
- Increased transaction volume by 35% by leading the integration of major vendors (ValU, Fawry), expanding payment options for the underbanked.
- Drove cross-functional alignment and established product KPIs to monitor adoption, transaction volume, and retention.

Product Manager, Nagwa Technologies — Egypt

April 2021 – February 2022

- Oversaw product backlogs and led engineering and design teams in agile ceremonies.
- Launched "Nagwa Classes" and "Nagwa Readers," successfully opening new B2C revenue streams to offset B2B volatility.
- Boosted content team throughput by 20% by launching an internal AI-enabled workflow for content creation, significantly reducing manual overhead.

Scrum Master, Squadio — Egypt

November 2020 – April 2021

- Facilitated and managed agile ceremonies, artifacts, dependencies, and team utilization.
- Optimized utilization by 15%, minimizing meetings, rework rates, and task switching, guiding the team to deliver 15+ increments to education service provider Aanaab.
- Coordinated with stakeholders to streamline backlog management, increments, and deployments.
- Mentored engineers and designers on scrum activities, artifacts, and the agility mindset.

Lead Business Analyst / Product Manager, Mawaqaa — Kuwait

August 2019 – November 2020

- Elevated documentation processes and policies to facilitate seamless communication, reducing project delays and improving alignment.
- Led analysis, design, and engineering teams in delivering several major projects.

Product Manager, TechOffice — Kuwait

December 2018 – July 2019

- Headhunted and assembled engineering, design, and testing teams to drive product development.
- Led the adoption and management of agile scrum and managed the backlog for different products.
- Drove revenue growth by launching drop-shipping products, landing 60+ clients in the first quarter.

EARLY CAREER HIGHLIGHTS

Business Analyst, Diyar United Company

2017 – 2018

- Led technical delivery of digital transformation projects (E-Driver's License), conducting "As-Is" vs "To-Be" analysis to implement process automation.

Full-Stack Developer, then Business Analyst, Ministry of Awqaf

2014 – 2017

- Managed end-to-end execution of workflow systems and an LMS, leading remote teams and defining scope with key stakeholders.
- Engineered and implemented web-based workflow systems for government asset management, ensuring compliance, transparency, and operational efficiency.

Instructor, Pitman Training

2013 – 2014

- Designed and delivered 800+ hours of technical training to 1,000+ students.

RECOGNITION & ADVISORY

- ADPLIST Top 50 Mentor in Customer Experience (2026, ongoing mentorship).
- MENA market-intelligence consultant for AlphaSights and Guidepoint (paid expert-network engagements on consumer, commercial, and market strategy across the region).
